

DATA SCIENCE WITH AI ROADMAP

Industry Oriented • Project Based • Job Ready
Learn • Analyze • Build • Innovate

Our Goal: To make students skilled, analytical and industry-ready Data Science professionals through practical learning and real-time projects.

PHASE 01 - Programming & Python Fundamentals

- Programming Basics
- Python Syntax
- Variables & Data Types
- Loops & Functions
- OOPs Concepts
- File Handling
- Exception Handling

Duration: 4-5 Weeks

PHASE 05 - Machine Learning

- Supervised Learning
- Unsupervised Learning
- Regression
- Classification
- Clustering
- Model Training
- Scikit-Learn

Duration: 4-5 Weeks

PHASE 02 - Python for Data Science

- NumPy
- Pandas
- Data Cleaning
- Data Manipulation
- Data Visualization
- Matplotlib
- Seaborn

Duration: 3-4 Weeks

PHASE 06 - Deep Learning & AI Basics

- Neural Networks
- TensorFlow Basics
- Keras
- NLP Introduction
- AI Concepts
- Chatbot Basics

Duration: 3-4 Weeks

PHASE 03 - SQL & Database Management

- DBMS Concepts
- SQL Queries
- CRUD Operations
- Joins & Subqueries
- MySQL / PostgreSQL
- Database Design

Duration: 2-3 Weeks

PHASE 07 - Data Visualization & BI Tools

- Power BI
- Tableau
- Dashboard Building
- Reports & Analytics
- Data Storytelling

Duration: 2-3 Weeks

PHASE 04 - Statistics & Mathematics for DS

- Probability
- Statistics Basics
- Mean, Median, Mode
- Correlation
- Hypothesis Testing
- Linear Algebra Basics

Duration: 2-3 Weeks

PHASE 08 - Deployment & Real-Time Projects

- Git & GitHub
- API Basics
- Flask / Streamlit
- Model Deployment
- Cloud Basics
- Real-Time Projects
- GitHub Portfolio

Duration: 3-4 Weeks

What You Will Build

- Machine Learning Models
- Data Dashboards
- AI Mini Projects
- GitHub Portfolio
- Industry Ready Skills

Career Roles

- Data Analyst
- Data Scientist
- Machine Learning Engineer
- AI Engineer
- Business Analyst
- Python Developer

Industry Tools

- Python
- Jupyter Notebook
- VS Code
- Power BI
- Tableau
- GitHub
- MySQL
- TensorFlow

Learning Approach

- Practical Learning
- Daily Tasks
- Weekly Assessments
- Live Projects
- Mentor Support

Internship Experience

- Real-Time Projects
- Team Collaboration
- Agile Workflow
- Data Analysis Projects
- Project Deployment

Placement Support

- Resume Building
- LinkedIn Optimization
- Mock Interviews
- Aptitude Training
- Placement Assistance

Certification

- Course Completion Certificate
- Internship Certificate
- Project Completion Certificate
- Industry Oriented Training

From Campus to Corporate

Analyze Data, Build the Future!

DATA SCIENCE WITH AI

Industry Oriented • Project Based • Job Ready

Learn • Analyze • Build • Innovate

Our Goal: To make students skilled, analytical and industry-ready Data Science professionals through practical learning and real-time projects.

PHASE 01 - Programming & Python Fundamentals

- Programming Basics
- Python Syntax
- Variables & Data Types
- Loops & Functions
- OOPs Concepts
- File Handling
- Exception Handling

Duration: 1-2 Weeks

PHASE 02 - Python for Data Science

- NumPy
- Pandas
- Data Cleaning
- Data Manipulation
- Matplotlib
- Seaborn
- Jupyter Notebook

Duration: 2-3 Weeks

PHASE 03 - Exploratory Data Analysis (EDA)

- Dataset Understanding
- Missing Value Handling
- Univariate Analysis
- Bivariate Analysis
- Outlier Detection
- Correlation Analysis
- Feature Engineering

Duration: 2-3 Weeks

PHASE 04 - Statistics & Mathematics for DS

- Probability
- Statistics Basics
- Mean, Median, Mode
- Correlation
- Hypothesis Testing
- Linear Algebra Basics

Duration: 2-3 Weeks

PHASE 05 - SQL & Database Management

- DBMS Concepts
- SQL Queries
- CRUD Operations
- Joins & Subqueries
- MySQL / PostgreSQL
- Database Design

Duration: 2-3 Weeks

PHASE 06 - Machine Learning

- Supervised Learning
- Unsupervised Learning
- Regression
- Classification
- Clustering
- Model Training
- Scikit-Learn

Duration: 2-3 Weeks

PHASE 07 - Deep Learning & AI Basics

- Neural Networks
- TensorFlow Basics
- Keras
- NLP Introduction
- AI Concepts
- Chatbot Basics

Duration: 2-3 Weeks

PHASE 08 - Data Visualization & BI Tools

- Power BI
- Tableau
- Dashboard Building
- Reports & Analytics
- Data Storytelling

Duration: 2-3 Weeks

PHASE 09 - Gen AI & LLM

- AI Tools & Applications
- ChatGPT & Prompt Eng.
- Large Language Models
- OpenAI APIs
- AI Automation
- NLP Applications
- AI Assistants & Chatbots
- Generative AI Projects
- AI Ethics & Responsible AI

Duration: 2-3 Weeks

PHASE 10 - Deployment & Real-Time Projects

- Git & GitHub
- API Basics
- Flask / Streamlit
- Model Deployment
- Cloud Basics
- Real-Time Projects
- GitHub Portfolio

Duration: 1-2 Weeks

What You Will Build

- Machine Learning Models
- Data Dashboards
- AI Mini Projects
- GitHub Portfolio
- Industry Ready Skills

Career Roles

- Data Analyst
- Data Scientist
- Machine Learning Engineer
- AI Engineer
- Business Analyst
- Python Developer

Industry Tools

- Python
- Jupyter Notebook
- VS Code
- Power BI
- Tableau
- GitHub
- MySQL
- TensorFlow

Learning Approach

- Practical Learning
- Daily Tasks
- Weekly Assessments
- Live Projects
- Mentor Support

Internship Experience

- Real-Time Projects
- Team Collaboration
- Agile Workflow
- Data Analysis Projects
- Project Deployment

Placement Support

- Resume Building
- LinkedIn Optimization
- Mock Interviews
- Aptitude Training
- Placement Assistance

Certification

- Course Completion Certificate
- Internship Certificate
- Project Completion Certificate
- Industry Oriented Training

STUDENT ENQUIRY FORM

Date: _____

1. Personal Details

Full Name: _____

Mobile No: _____ WhatsApp No: _____

Email ID: _____

Gender: ☐ Male ☐ Female ☐ Other

Address: _____

2. Educational Details

Qualification: _____ Year of Passing: _____

College / University: _____

Branch / Specialization: _____

3. Course Interested In

☐ Java Full Stack ☐ Python Full Stack ☐ Data Science ☐ Digital Marketing

☐ Testing Tools ☐ AI & ML ☐ Internship Program ☐ Other: _____

4. Purpose of Joining

☐ Job Placement ☐ Skill Development ☐ Internship ☐ Career Change ☐ Certification ☐ Project Support

Other: _____

5. Preferred Batch Timing

☐ Morning ☐ Afternoon ☐ Evening ☐ Weekend

6. Mode Preferred

☐ Online ☐ Offline ☐ Hybrid

7. How Did You Know About Us?

☐ Instagram ☐ LinkedIn ☐ Google ☐ Friends ☐ WhatsApp ☐ Walk-in ☐ Other: _____

8. Counsellor Notes

9. Follow-up Status

☐ Interested ☐ Follow-up ☐ Demo Class ☐ Joined ☐ Not Interested

ARTIFICIAL INTELLIGENCE & MACHINE LEARNING ROADMAP

Industry Oriented • Project Based • Placement Guarantee
Learn • Innovate • Automate • Transform

Our Goal: To make students skilled, innovative and industry-ready AI & ML professionals through practical learning, real-time projects and advanced technology training.

PHASE 01 - Programming & Python Fundamentals

- Programming Basics
- Python Syntax
- Variables & Data Types
- Functions & OOPs
- File Handling
- Exception Handling
- Logic Building

Duration: 4-5 Weeks

PHASE 05 - Machine Learning

- Supervised Learning
- Unsupervised Learning
- Regression
- Classification
- Clustering
- Scikit-Learn
- Model Training & Evaluation

Duration: 4-5 Weeks

PHASE 02 - Python for AI & Data Science

- NumPy
- Pandas
- Data Cleaning
- Data Manipulation
- Matplotlib
- Seaborn
- Jupyter Notebook

Duration: 3-4 Weeks

PHASE 06 - Deep Learning & Neural Networks

- Artificial Neural Networks
- TensorFlow
- Keras
- CNN Basics
- RNN Basics
- NLP Introduction
- Chatbot Development Basics

Duration: 4-5 Weeks

PHASE 03 - SQL & Data Management

- DBMS Concepts
- SQL Queries
- CRUD Operations
- Joins & Subqueries
- MySQL / PostgreSQL
- Database Integration

Duration: 2-3 Weeks

PHASE 07 - AI Tools & Generative AI

- ChatGPT & Prompt Engineering
- OpenAI API Basics
- AI Automation Tools
- Generative AI Concepts
- AI Applications
- AI Ethics

Duration: 2-3 Weeks

PHASE 04 - Mathematics & Statistics for AI

- Probability
- Statistics
- Correlation
- Hypothesis Testing
- Linear Algebra Basics
- Calculus Basics

Duration: 2-3 Weeks

PHASE 08 - Deployment & Real-Time Projects

- Flask / Streamlit
- Model Deployment
- API Integration
- Git & GitHub
- Cloud Basics
- Real-Time AI Projects
- GitHub Portfolio Building

Duration: 3-4 Weeks

What You Will Build

- AI Applications
- Machine Learning Models
- Chatbots
- AI Dashboards
- GitHub Portfolio
- Industry Ready Skills

Career Roles

- AI Engineer
- Machine Learning Engineer
- Data Scientist
- Python Developer
- NLP Engineer
- AI Research Assistant

Industry Tools

- Python
- TensorFlow
- Scikit-Learn
- OpenAI
- GitHub
- MySQL
- Jupyter Notebook
- VS Code
- Power BI

Learning Approach

- Practical Learning
- Daily Coding Tasks
- Weekly Assessments
- Live AI Projects
- Mentor Support

Internship Experience

- Real-Time AI Projects
- Team Collaboration
- Agile Workflow
- AI Model Deployment
- Project Reviews

Placement Support

- Resume Building
- LinkedIn Optimization
- Mock Interviews
- Aptitude Training
- Placement Guarantee

Certification

- Course Completion Certificate
- Internship Certificate
- AI Project Completion Certificate
- Industry Oriented Training
